

THEA RENDER ROADMAP

We present here the roadmap of Thea Render for next releases¹. The following roadmap contains only the major/central feature related to a specific release. Various other secondary features will be also added - they will be announced at time of development.

Each update in 1.x series is expected to take 2-3 months. Updates in 1.x series are free of charge for Thea Render customers. Version 2.x will have the same price as version 1.x and update cost for Thea Render customers won't exceed one third of the price.

¹ The roadmap presented here is the development/marketing plan and does not constitute an agreement with the end users. Actual implementation of the roadmap may vary depending on the development status and potential re-evaluation made along the way.
